

# PLI000 ANTI-SKID TAPES

**Description:**

PL1000 anti-skid tapes are tough & durable and provides an excellent skid resistance because of the grips provided by the grit surface of the tape. Constructed of mineral coated plastic film and then top coated with a thick spread of silicon oxide grit is coated with pressure sensitive adhesive protected by a release liner on the back side.

**Features:**

Good anti-skid resistance; high tensile ; strong weather resistance; economical and simple application.

**Application:**

It is suitable for recreational areas such as ramps, playgrounds, pool areas, supermarket, stairways, work areas, snowmobiles, scooters, construction machinery, vehicles, machine shops, hazardous floors, industrial equipment, lawn equipment, trucks and trailers.

**Technical Data:**

Compatibility	Painted wood、 painted metal、 concrete、 asphalt、 porcelain、 fiber glass
Color	Black
Application temperature	Above 10°C
Performance time	At least 1 year under 22°C/50% RH
Standard Dimension	Standard length: 10m Standard width: 2.5cm, 5.0cm Or according to customer's requirement.

**Application Methods:**

- 1 、 Apply tape only to a clean, dry, grease & dust free surface. Coated with P120 contact adhesive if needed.
- 2 、 Cut the tapes according to your need, peel off the release liner.
- 3 、 Press firmly into position to obtain maximum adhesion from the adhesive. You can get the best adhesion at 23C. At low temperatures, there is a chance of condensation forming, and the tack of the adhesive can be reduced.
- 4 、 Use rubber roll or rubber ramp to press.

**Important notice:**

Information, data, and other statements are based on Our test results suggest that users should determine Intended use of the product.
