

PL4000 Temporary Pavement Marking Tape

Description:

PL4000 temporary preformed road marking tape is prefabricated by our company with unique technology, using rubber as the base material. It features high reflectivity, fast construction and easy removal, mainly used for temporary markings in various road reconstruction and expansion projects.

Features:

- Excellent reflectivity
- Good flexibility
- Quick installation and easy removal

Application:

Suitable for temporary road markings in various road reconstruction and expansion projects.

Technical Data:

Item	PL4001 (White)	PL4002 (Yellow)	Unit	Testing Standard
Color	White	Yellow	—	—
Thickness	0.9	0.9	mm	GB/T 7125
Retroreflective Coefficient	200	150	mcd/m ² /lux	GB/T 24717
Water Resistance	Pass	Pass	—	GB/T 24717
Alkali Resistance	Pass	Pass	—	GB/T 24717
Abrasion Resistance	30	30	mg	GB/T 24717
Adhesion	12	12	N/25mm	GB/T 24717
Skid Resistance Value	45	45	BPN	GB/T 24717

Performance Life:

24 months under normal temperature storage.

Standard Dimension:

- Standard length: 50m, 100m
- Standard width: 10cm, 15cm (customizable)
- Available colors: white, yellow, orange

Important notice:

All above data and information are based on internal tests of our company. Users must confirm product applicability for intended use before application.
